UNIVERSITY OF
CALGARY
GEOLOGY & GEOPHYSICS

The University of Calgary is pleased to announce the implementation of a new graduate program entitled
Masters Specialization in Reservoir Characterization

This innovative course-based Master's degree, open to graduate engineers, geologists and geophysicists, is offered jointly by the Department of Chemical and Petroleum Engineering and the Department of Geology and Geophysics.

Program Highlights

The program integrates reservoir engineering, geology and geophysics. Students will have the opportunity to take courses outside their main discipline, study geostatistics and reservoir simulation together and undertake a field development planning exercise in multi-disciplinary teams. A team-building course is also offered as part of the program.

Program Benefits

Graduates will have the expertise to work effectively on multidisciplinary teams to address the diverse challenges involved in the exploration, development and production of petroleum resources.
